SUMMARY

Computer Engineering student with a 9.36/10 CGPA and hands-on experience building web applications using HTML, CSS, JavaScript, Python, C++, SQL and Firebase. Strong interest in software engineering, problem solving and user-focused systems, with project experience in API integration, responsive interfaces, authentication, cloud data and access control.

EDUCATION

B.Tech. in Computer Engineering — Institute of Advanced Research (IAR), Gandhinagar

June 2023 – Present

CGPA: 9.36/10 | Semester 7

TECHNICAL SKILLS

- **Languages:** C++, Python, JavaScript, SQL
- **Web:** HTML5, CSS3, JavaScript, Bootstrap
- **Database & Backend:** MySQL, Oracle SQL, Firebase Firestore, Firebase Authentication, Firebase Cloud Storage
- **Tools:** Git, GitHub, VS Code
- **Currently Learning:** MongoDB, Node.js, AI/LLM fundamentals

PROJECTS

HomeVault — Family & Personal Document Organizer (In Progress)

Tech: HTML, CSS, JavaScript, Firebase Authentication, Firestore, Cloud Storage, Security Rules

- Developing a web-based platform to organize personal and family documents with authentication, family management, document storage, sharing and expiry tracking.
- Developed the registration and login flow using Firebase Authentication with email/password authentication.
- Implemented persistent sign-in functionality and logout handling with user confirmation.
- Connected authenticated users with Cloud Firestore to store user profile information.
- Designed and developed the HomeVault landing, registration and login interfaces with a responsive, user-focused UI.

Daily News Digest — Python-Based News App

Tech: Python, Tkinter, GNews API, Requests, Pillow, Threading

GitHub: <https://github.com/divyapatel30/News-App>

- Built a desktop news application that fetches and displays articles across World, Business, Technology, Sports and Health categories.
- Integrated REST API data with images, clickable article links and a scrollable user interface.
- Used threading for responsive API/network operations and added error handling for connectivity and API failures.

Personal Portfolio Website

Tech: HTML5, CSS3, JavaScript

GitHub: <https://github.com/divyapatel30/Personal-Portfolio>

- Developed responsive portfolio to showcase projects, technical skills, GitHub work and professional profile.
- Designed a clean, responsive UI with user-friendly navigation across desktop and mobile screen sizes.
